#### **LEGISLATIVE REQUIREMENTS**

This Revenue Statement is a requirement of S104 (5) (a) of the *Local Government Act 2009* and S169/S172 of the *Local Government Regulation 2012*.

In outlining its Revenue Statement, the Council will adhere to specific legislative requirements for the content of the Revenue Statement.

Chapter 5 (Section 172) of the *Local Government Regulation 2012* requires that the following matters be included in the revenue statement:

- (1) The revenue statement for a local government must state-
  - (a) If the local government levies differential general rates-

  - (b) Whether the local government has made a resolution limiting an increase of rates and charges

#### **DIFFERENTIAL GENERAL RATES**

In accordance with Sections 92 and 94 of the *Local Government Act 2009* and Section 172(1) of the *Local Government Regulation 2012*, Blackall Tambo Regional Council will levy differential general rates on rateable land. Further, Council considers that there should be a minimum charge for all rate categories.

Differential General Rates are levied to contribute towards the provision of local government services excluding sewerage collection and disposal, water supply, and refuse collection and disposal. However, any funding shortfalls in the excluded services may be covered by the differential general rates.

The rationale for the differing categories is to recognise the different levels of facilities and services provided to the differing classes of land and the occupiers of these classes of land. A greater variety of services are

Revenue Statement 2024/2025

provided within Urban areas however services for Rural land may be at an increased cost on a per premises basis due to the long distances involved with provision of these services. Town rural land being generally located in the vicinity of urban areas and having a higher population density than Rural land places a higher demand on urban facilities along with higher expectations of services.

The basis for applying differential general rate is:

- The site value or unimproved capital valuation (UCV) as determined by Department of Resources, and
- · the land use code (LUC), and
- assessment land area; and
- Zoning from the Council Planning Scheme

This approach provides the best available equitable basis of distributing the differential rating burden within the Urban, Rural, Commercial, and Industrial categories incorporating the aspect of area of land utilised by the ratepayer.

### MINIMUM DIFFERENTIAL GENERAL RATES

Minimum general rates are applied to each category to recognise that there is a base level of services applicable to each rateable parcel of land within each category.

A subjective measure of this level is used to determine the minimum rate for each category of differential general rates.

In determining if a minimum differential general rate is to be applied, the applicable rate in the \$ for the category is to be applied to the Department of Resources valuation of the rateable property and the result of the calculation is to be compared to the applicable minimum rate for that category. The effective rate charged will be the higher of the two amounts.

## **DIFFERENTIAL GENERAL RATE CATEGORIES**

### **CLEANSING**

Council makes and levies utility charges for the provision of waste management services, which are calculated to recover the full cost of providing the service. The purpose of the waste management charging system is to fund the collection, operations and maintenance of the waste collection service performed within the Blackall-Tambo Regional Council waste collection areas. The objectives of the Waste Collection charging system are:

- Cover the costs associated with the collection of waste within collection area; and

## **COST RECOVERY FEES**

Section 97 the *Local Government Act, 2009* empowers the Council to fix, by *local law or resolution, a fee for any of the following:*

Such regulatory fees must not be more than the cost of providing the service or taking the action for which, the fee is charged. Section 98 of the *Local Government Act 2009* states that the local government must keep a Register of its cost recovery fees and information about the fee must be recorded in the Council's Register of Regulatory Fees.

## COMMERCIAL CHARGES

Section 262(3)(c) of the *Local Government Act, 2009* provides the Council, with powers to charge for services and facilities it supplies other than a service or facility for which a regulatory fee may be fixed. The making of commercial charges may be delegated by the Council (recorded in the Delegations Register). Commercial Charges are subject to the Goods and Services Tax.

Such charges may be reviewed by the Council at any time and will be recorded with the Register Regulatory Fees as a listing of Commercial Charges. The nature, level and standard of the entitlement, facility or service is considered by the Council in the setting of commercial charges. Central to deliberations on these matters is the Council's community service obligation and the principle of social equity.

The principle of "user pays" is considered only where the provision of a service, entitlement or facility may be in direct competition with private enterprise.

## **DEVELOPER CONTRIBUTIONS**

Physical and social infrastructure costs for new development will ideally be funded by charges (developer contributions) for that development. The unexpended balance of developer contributions shall be appropriated to a constrained works reserve at the close of each financial year.

Such constrained works reserve shall indicate the nature of the works to be undertaken using the developer contribution.

A developer contribution shall be expended only on works for which the contribution was made.

Local Government Act 2009 Local Government Regulation 2012, Section192

### **OBJECTIVE**

To prescribe the circumstances and terms on which Council may borrow money.

### **DEFINITIONS/APPLICATION**

This policy applies to all external borrowing of money by Council.

## **POLICY STATEMENT**

It is Council's intention that, to provide a better service and value for money to ratepayers, Council will restrict the purpose of loans to asset acquisition and expenditure of a capital nature only. The service that will be provided by long term assets will benefit present and future generations; therefore, it is the opinion of Council that the cost should be shared between present and future generations.

The appropriate mix of debt to internal funding used is intended to provide the lowest long-term level of rates which does not over-commit the future, and which provides adequate flexibility of funding in the short term. The total debt will depend on the outlook for growth in the region. The term of the debt will relate to the life of the asset created but will not exceed 20 years for any individual asset.

Council at the 1 July 2024 is debt free.
